Overview

About Lake Cumberland Regional Hospital

Cumberland Regional Hospital is a 259-bed acute-care facility. Continually upgrading to provide the latest in medical technology and services, the hospital has completed eight major expansion projects since it opened in 1976.

A modern, state-of-the-art facility, Lake Cumberland Regional Hospital offers complete cardiac care, including open-heart surgery, interventional cardiology and electrophysiology as well as a neuroscience institute that is rated among the best in the nation.

The hospital also contains a complete clinical laboratory, 24-hour ER, intensive care units, surgical services, including orthopedic and urological, as well as diagnostic imaging — featuring MRI, 64-slice CT, PET and digital mammography. Other specialty services include women's and children's services, a Level II neonatal nursery, cardiopulmonary services, behavioral health unit, geriatric unit, and inpatient rehabilitation unit.
